

is hosting the following free training:

You are invited to a LAMP seminar:

LAMP Seminars Present Tools and Techniques

This workshop is designed for individuals who want to learn new AAC skills and strategies to enhance the lives of people with ASD. The seminar will examine the current research and the history of augmenting speech for people with ASD. Participants will study communication assessment and augmentative implementation procedures, with an emphasis on the use of multi-modal communication systems.

Training Leader:
John Halloran, M.S., CCC-SLP
Senior Clinical Associate

A consultant with PRC since 1994, John is a speech-language pathologist actively involved in exploring ways to best implement assistive technology with children with autism. John graduated with his masters degree from the University of Arkansas—Medical Science. He is currently working to develop a training program for children with ASD and their families.
